Better decisions on every motor claim

Rules decide, people stay in control, and every change is traceable. Pick an area to see what it does.

Intake & decision | Policy change control | Reviewer | Measurement | Business case

Every claim gets a recommendation, with the rule behind it

Routine processing, request information or human review. Rules evaluate the supplied facts; claim documents can be attached, but automatic fact extraction is not implemented. A blank field stays unknown.

Business case

Mid-sized European motor insurer · per year · Sources

Net benefit per year	Payback	Staff hours saved per year
€443,246	6.8 months	7,200

1 · Triage cost per year

Today	60,000 claims × 15 min	€675,000
With system	Routine 2 min · info 5 min · review 15 min · + €120,000 running	€471,000

2 · Cost of errors per year

Measured on 14 test cases

Today	0.5% wrongly waved through × €1,000	€300,000
With system	Measured 0% wrong routine under v2; we assume at least 0.2%	€120,000

Policy	Wrong routine	Unnecessary review	Cost per year
v1 rules on v1 cases	0%	0%	€120,000
v1 rules after the v2 change	14%	0%	€8,571,429
v2 rules on v2 cases	0%	0%	€120,000

1 wrong payment = 89 unnecessary reviews, so uncertain cases go to a person.

3 · Cost of one policy change

v2 as the example · counted 3× per year

Today	Retrain 25 reviewers × 2 h, recheck all 3,000 open claims by hand	€24,750
With system	Owner 4 h with live impact preview, review only the 429 flagged claims	€5,001
